

Marketing, Exports and After Sales Services invites domestic & international alliances

With H.O. located at Hyderabad (A.P.), the Company has explored southern India markets leaving dense population of successfully launched **Zero Discharge / Evaporation Plants**. JAL has ventured western India markets extending to northern territory by way of establishing Branch Offices and appointing Dealers and Agents.

Head Office : Hyderabad (A.P.)
Branches : Baroda - Indore
Dealers & Agents : Bengaluru - Chandigarh
International associate : CA - USA - Vietnam - Taiwan

JAL has executed over 100 plants across India, Asian & African countries through vast field experience and design ability. The Company expects to do more territories by appointing international dealers and agents.

The Company employs around 70 engineers, technicians and field administrators conveniently located in different area of operations to be able to meet clients' requirements efficiently with the shortest time possible.

With presence of associate in USA, JAL sources R&D modules and equipments that places our Products & Plants in international standards.

JAL offers after sales services which is covered by the warrantee program and supported by skilled technicians who are available on call. JAL engineers are trained to assist their customers with the application, technical matters, as well as system operations i.e. right from commissioning to operation to maintenance.

Remember, effluents falling in limits specified by PCB can only be discharged.

JAL appreciates receiving call clarifying any of followings:

- Can our kind of effluent be treated?
- How do you propose to treat our effluent?
- Can any recoveries be made possible, from our effluent, to achieve economy?
- Can we reduce effluent volumes?
