

Product Range - drinking water plants

Reverse Osmosis Plant & Systems

Ultraviolet Water Purifiers

Ozone Generators

Ozone Applications

Bottling Machines

Water Softeners

Demineralization (DM Plant)

Our vision is to be the dominant player in the branded water business. JAL is also engaged in designing, customizing and manufacturing high pure water treatment plants. JAL cater to the needs of Industrial establishments, Bottled water projects, Electronic industry, Pharmaceuticals, Hospitals, Hotels, large Residential complexes and Swimming pool filtration plants, along with plant accessories. Treatment plants are designed for any capacity suitable to customer's needs.

The Company offers state-of-the-art fully automatic operational plants, which confirm to the standards set by B.I.S. Our systems are designed after extensive research to meet the challenges of the modern usages, consequentially offering clean, chemical-free and odorless water.

JAL offers turnkey solutions for:

- **Mineral water boiling plant which confirm to the standards set by B.I.S. (Bureau of Indian Standards).**
- **Reverse osmosis plants (upto 30 KLPH) for high purity process water used in industrial applications.**
- **Water treatment for air conditioning plants / cooling towers, boiler feed water etc.**
- **Hard water conversion to soft water / highly pure drinking water units.**
- **Iron / Pesticide removal from bore well water.**
- **Effluent and sewage treatment plants as per pollution control norms.**
